

Product safety information

Aluminum curtain rails and metal or plastic accessories

Product groups: 051, 060, 061, 063, 064

Thank you for choosing our aluminum curtain rails and/or accessories. For your safety, please observe the following instructions:

1. Related documents

Our catalogs show the accessories that are compatible with each rail system.

2. General safety

When used properly and under the following conditions, our curtain rail ranges do not pose any danger:

- Observe the generally applicable safety precautions when using (electric) tools and ladders.
- Use the curtain rails and accessories exclusively for their intended purpose, i.e., attaching curtains and drapes or hanging pictures.
- Avoid overloading by hanging other heavy objects, which can lead to bending, breakage, and/or the fastening screws being torn out.
- Only use fastening materials that are suitable for the substrate.
- If you discover damage to load-bearing parts, replace them immediately.
- Rough cut edges can cause skin injuries. Therefore, wear suitable gloves during installation.
- For sets with chains or ribbons, the appropriate fasteners must be installed to prevent strangulation.
- Metal shavings are produced when cutting aluminum components. Please protect your eyes with safety goggles (PPE).
- Punching pliers and bending devices can cause bruising and injuries. They may therefore only be used by skilled tradespeople and must never be allowed to fall into the hands of children.

3. Precautions for children

For safety reasons, children should not come into contact with the product components and packaging:

- Many accessories are small parts that can be swallowed. Therefore, keep them away from small children.
- The cut edges can cause skin injuries. Children should therefore not have unsupervised contact with the rails.
- Plastic bags used for packaging can cause suffocation.
- Ribbons or chains can cause strangulation.

4. Risks associated with improper use

Improper use or installation can lead to the following risks:

- Overloading the rails can cause the fastenings to fail or the rails to break. This can result in injury.
- Improper fastening can cause the fastenings to fail, resulting in injury.

5. Risks when used properly

None

6. Material compliance

The materials and packaging used in our curtain rail ranges comply with legal requirements and are REACH-compliant. They do not contain any products that are hazardous to health.

7. Care instructions

To ensure the longevity of the products, please note the following instructions:

- Avoid aggressive cleaning agents, as these can damage the surface.
- Clean the products with a dry or slightly damp cloth.
-

8. Special instructions

When using the "Gleitfix" adhesive available as an accessory, please be sure to observe the safety data sheet at <https://moeller-profilsysteme.de/datenblaetter/>.

When using the instant adhesive available as an accessory, please be sure to observe the safety data sheet at <https://moeller-profilsysteme.de/produktsicherheit/>

Electric motors for drive purposes may only be connected by trained electricians unless they are ready to plug in. Please observe the instructions enclosed in the packaging.

9. Contact and inquiries
